

Tarsco Bolted Tank®
a TF Warren Company

Full service provider of liquid and dry bolted storage tank systems

DRY BULK PROJECT CALEDONIA, NEW YORK

Feed ingredients terminal in northwest New York

Quantity of silos: 16
Product in silos: Feed Ingredients
Usable ton per silo: 226
Size: 18.46' x 57.03'

A Tarsco Bolted Tank customer needed a feed ingredients terminal in northwest New York. The end user purchased property in Caledonia, NY next to a rail spur and constructed a rail-to-truck load out terminal. In this load out system, 16 smooth wall epoxy powder coated bolted storage silos from Tarsco Bolted Tank were used to store multiple feed ingredients. These feed ingredients are brought in by railcar and offloaded into the 16 silos. The feed ingredients are conveyed out of the silos and fed into the mixing system based on the customer's specifications. Once the mixing is complete, the product is loaded out into local delivery trucks.
